Apprentice shall submit monthly work progress hours by the fifteenth (15th) day of the following month. **Apprentices may not count more than 184 hours per month toward the required hours for the completion.** Overtime, Sick Leave, and Paid Time Off do not count towards completion of the apprenticeship.

Name of Program: Aerospace Joint Apprenticeship Committee (AJAC) #1828 - Industrial Maintenance / Automation Technician

Instructions for Apprentice Work Progress Record

This is the permanent record of your apprenticeship. Make the entries in ink and have your supervisor sign each month's report. **The original should be kept for your records and the monthly total hours recorded electronically through the AJAC Apprentice Tracking System (ATS): <http://ats.ajactraining.org>.**

We recommend that you start a binder to keep these hard copy record sheets. The worksheet is the work record for one year. Each column represents one month. Mark the number of hours worked on each month on the row that lists the skill from the apprenticeship standards. Total the hours you worked each month on each row and record that number in the row titled "Total Hours". Report the total in the ATS.

The hours from your work progress record are due at AJAC by the 15th of the month following the month you just completed (i.e. hours worked in January are due by February 15th). Failure to report hours by the 15th of the month may result in loss of hours and other disciplinary action. **Apprentices may not count more than 184 straight hours per month toward the required hours for completion.**

Work Codes:

IM-1: Machine Operation (1,000 hours): exposure to standard operating procedures of industrial equipment i.e. product conveyance systems, numeric controlled systems, weighing and packaging equipment, automated sorting systems, etc.

IM-2: Machinery & Equipment Installation (2,500 hours): i.e. mechanical, pneumatic and hydraulic systems, equipment positioning and rigging, cable routing, mechanical alignments, PLC and power-up sequencing, automation set-up and alignment, etc.

IM-3: Machinery & Equipment Maintenance (2,500 hours): industrial preventative maintenance i.e. fluid/power/mechanical transmission, component rebuilds, CMMS or work order documentation, clean and inspect automation equipment, etc.

IM-4: Machinery & Equipment Repair (2,500 hours): i.e. diagnostic testing, component replacement, documentation, part procurement, manual/paper troubleshooting, etc.

IM-5: Inspection & Bench Work (1,000 hours)
